

Intelligence Vidyarthi is a platform that emphasizes the importance of life skills lessons in their pedagogy just as much as academic skills. We help children develop skills such as conflict resolution, empathy, confidence, leadership, self-management, and conversational confidence, paving the way for their future success. Failures are no longer feared by children. Instead, they welcome challenges and prefer to work hard to achieve their goals. As a result, when these children reach adulthood, they will be self-assured and responsible citizens.

The institution you choose for your child is critical in instilling essential life skills in young minds. It will determine how children are not only groomed academically, but also in terms of life skills and positive psychology. After all, this is the true purpose of [Intelligence Vidyarthi](#), to cater to the holistic development of children.

At Intelligence Vidyarthi, which is ranked among the best life skills schools, we believe that life skills are just as important for children as academic knowledge. These abilities are critical to their [future success in all areas of life](#). Schools may help lay a strong foundation for academics, but we must channel children into the right institution to instill and hone these life skills. We, at Intelligence Vidyarthi, understand our responsibility as an educational institution to our students and thus go to great lengths to ensure that we instill life skills in our students in the most natural and effective way possible.

After all, our children are the future of our country, and the earlier they are equipped with life skills, the better their chances of developing into leaders and successful individuals in the future.

The world may have changed significantly. Technology has the potential to drastically alter our lives. But one constant has been parents' desire to provide the best for their children. And this is something that is unlikely to change!

Having said that, what do you believe lays the groundwork for the best life that parents want for their children? It is, in fact, education! As a result, it is not incorrect to say that the seeds for a successful future are sown at the institution where your child spends their time. That's because a school's role is still limited to providing merely [academic knowledge](#), whereas Intelligence Vidyarthi goes far beyond that.

At Intelligence Vidyarthi, India's leading life skills platform, we firmly believe that a school only provides education to its students and does not assist them in learning essential life skills that are necessary for them to grow into good citizens.

Life skills are abilities that enable us to live meaningful and happy lives. If the child learns enough life skills, he or she will be able to thrive in the future. However, it has been observed that in order to prepare the children for the rising competition, a great deal of emphasis is frequently placed on their academic performance. And, in order to perform reasonably well in academics, other important areas of development such as personality, morals, character, behavior, etc., often take a back seat.

This brings us to a critical question: Do you believe that good grades alone will ensure your child's success? No! After all, Intelligence Vidyarthi believes that success is more than just grades and scores. It takes a lot more. To attract true success, an individual must have excellent communication skills, personality, social etiquette, and strong ethics and values, among other things. This is precisely why life skills must be instilled in young minds, and this is exactly what we do.
